#### STATEMENT OF OBJECTS AND REASONS.

The importance of maintaining both the efficiency and the position of village officers is generally recognised and the Government have had for some time under their consideration the

steps best adapted to attain that end. Under the existing law applicable throughout the greater part of the Presidency, not only is the right of succession to such offices confined to the family of the last holder but the appointing authority, whether Native or European Officer or Proprietor, is bound to appoint the nearest qualified heir in accordance with the rule of primogeniture. The result of this state of the law has been found by experience to be very unsatisfactory. Persons who are neither by position nor capacity competent to do justice in these appointments have had to be put in, with the result, not only that the village administration suffers but that the offices themselves are liable to be brought into contempt. One method of dealing with this difficulty would be found in the abolition of the hereditary principle altogether but the balance of advantage is believed to be against that step and it has been determined to adhere to the general principle which has so long regulated successions in village offices in most parts of Southern India. All that is proposed in this Bill is to make a comparatively minor alteration in regard to the application of that principle by removing the strict rule of primogeniture and empowering the appointing authority to select the best qualified member of the family possessing hereditary claims to the office. With the same object of ensuring the person most well-qualified to carry on, with credit to himself and the village, the work of the office in question, certain modifications are proposed in regard to disqualifications for holding village offices and as a corollary of the removal of the strict rule of primogeniture the present provisions regarding the right to sue for a village office are proposed to be abrogated.

It is at the same time been considered desirable, in the interests of facility and of certainty in village administration, to place such restriction on the number of appeals which can be made in regard to village offices.

The present Bill lays down the simple principle that there should be one appeal allowed in every case, no appeal power being retained as a further safeguard against any misworking of justice. This change is in accordance with the general principle of decentralization and will enable the final decision in most cases in which village offices are concerned to be arrived at within the district.

The principle of decentralization has also been followed in effecting certain changes which delegate to tahsildars and deputy tahsildars powers over village officers. Experience has shown that they are fully competent to exercise these powers and for administrative reasons it is considered that they should exercise them. The need for this delegation was definitely recognized as long ago as 1900, but effect could not be given to the decision pending enactment of these Acts.

Finally the opportunity has been taken to clear up a point of minor importance relating to the application of the Hereditary Village Officers Act of 1883 to villages newly formed by the grouping of a ryotwari with a zamindari village or of two villages belonging to different estates and to clarify the publication of administration reports under the two Acts, as they no longer serve a useful purpose.

#### *Notes on the clauses.*

##### *Amendments to the Madras Proprietary Estates' Village Service Act, 1894.—*

Clause 2 (1).—Certain essential additions are made to the list of disqualifications.

Clause 2 (2).—These changes provide for the retention of the hereditary system and for the abolition of the strict rule of primogeniture.

Clause 3.—The verbal alteration is due to the new shape of section 12.

Clause 4.—The effect of suspension or dismissal is often confused by the retention of the office in the family of the defaulters. Hence the inclusion of the word "undivided".

Clause 5.—With the abolition of the strict rule of primogeniture, capacity becomes a disqualification for office under section 10 (1). Hence section 10 becomes superfluous.

Clause 6.—The verbal alteration is due to the deletion of section 12.

Clause 7 (1).—The necessity for a general provision of this nature is obvious.

Clause 7 (2).—These changes affect the delegations of powers and the alterations in the rules regarding appeal and revision referred to above.

Clause 8.—This change is a necessary consequence of the abolition of registry of villages.

Clause 9.—This change provides for the framing of rules to regulate the exercise of the powers newly delegated in section 16.

##### *Amendments to the Madras Hereditary Village Officers Act, 1883.—*

Clause 10.—For the sake of uniformity the same phraseology is used in the two Acts.

Clause 11 and 12 (1).—The wording of the existing Act failed to cover the case of a village formed by the grouping of a ryotwari with a zamindari village or of two villages belonging to different estates. The changes remedy this obvious omission.

Clause 12 (2).—The changes are designed to clear a doubt that has arisen over the scope of section 6 of the Act.

Clause 13.—Greater elasticity is provided by a delegation of powers subject to rules made under section 23 of the Act in place of an enumeration of such powers in the Act itself.

Clause 14, 15 and 21.—These changes are in accordance with those proposed in the Madras Proprietary Estates' Village Service Act of 1894.

Clause 16.—The alteration is due to the abolition of the strict rule of primogeniture.

Clause 17.—The abolition of the right to sue for office is a corollary to the abolition of the strict rule of primogeniture.

Clause 18.—The changes are due to the abolition of suits and of the publication of administration reports under the two Acts. They also provide for the limitation by rules of the powers delegated to tahsildars and deputy tahsildars. See note to clause 23.

## REVENUE NOTIFICATIONS.

## DENATURED SPIRITS.

No. 11.—Whereas it has been found necessary to revise the rules providing for control of the production, possession and sale of denatured spirits in the Madras Presidency, the following rules have been framed by the Board of Revenue under sections 5, 7, 11, 15, 17, 18, 24 and 25 (a) of the Madras Excise Act I of 1885 as amended by Act I of 1905, Act I of 1915 and Act I of 1917 in substitution of the rules contained in Notification No. 15, dated 26th October 1911, published on pages 1280-1291 of Part II of the Port St. George Gazette, dated 11th November 1911.

1. *Definition*.—Denatured spirit means spirit subjected to a process prescribed by the Local Government by notification for the purpose of rendering it unfit for human consumption. The process prescribed for ordinary denatured spirit in the Madras Presidency is the admixture with spirit of at least 25 degrees over-proof of light camphoraceous and pyridine bases in the proportion of half a gallon of light camphoraceous and half a gallon of pyridine bases to 50 gallons of spirit. The light camphoraceous and the pyridine bases must adhere to the laboratory tests described in the appendix. Methylated spirit means denatured spirit rendered effectually unfit for human consumption by the admixture of crude wood naphtha in the proportion of one part of crude wood naphtha to nine parts of spirit. The use of crude wood naphtha in a highly purified condition is not permitted.

Denaturation by other process may be permitted by the Board of Revenue.

2. *Import*.—Spirit manufactured and denatured locally shall be exempt from duties duty.

3. *Import*.—Denatured spirit may be imported by sea, but samples must be submitted to the Board's laboratory and three bottles to be fully denatured before one is removed from the customs-house. In the case of imports by sea from other provinces of British India, a certificate from the Collector of Customs at the port of arrival to the effect that the spirit has been fully denatured with light camphoraceous and crude pyridine bases may be accepted.

Denatured spirit may be imported from other provinces by land with the previous permission of the Collector, provided that the spirit to be imported has been fully denatured and down to not less than 50 degrees and provided also that such spirit is transported from the frontier to its destination under cover of a permit in form D.S.-6.

Spirit which it is proposed to import that is not sufficiently denatured must either be denatured abroad at the expense of the importer or it must pay duty at the full tariff rate as potable spirit.

Manufactured spirit may be imported only with the special sanction of the Board of Revenue.

The import of quantities within the limits of private possession is not altered by these restrictions.

4. *Export*.—Denatured spirit may be exported by distillers and holders of D.S.-5 licences to places outside the Presidency under a permit in form D.S.-4 granted by the Collector of the district of export. When applying for the permit the exporter shall present to the Collector a permit authorising the import from the Collector or other officer empowered in that behalf of the district to which the spirit is to be exported.

5. *Requirements*.—Denatured spirit may be manufactured by holders of distillery licences in the Presidency provided (1) that the light camphoraceous and pyridine bases or wood naphtha to be mixed with the spirit must first be tested and approved in the Board's laboratory, (2) that they must be kept under lock and key, and used under the supervision of the distillery officer and (3) that they must be used in the proportions prescribed and in the manner detailed in rule 1 and the appendix to these rules. The Board's previous sanction must be obtained for the employment of special methods of denaturation for spirit intended for use in particular arts and manufactures.

6. *Licences*.—If desired and—The distiller who manufactures denatured spirit will be allowed to sell to holders of licences under these rules either from their distilleries direct or from depots established with the approval of the Collector quantities of not more than 150 gallons of denatured spirit or 50 gallons of methylated spirit at one time. The wholesale depot licensee shall be in form D.S.-1.

7. *Licences*.—*Wholesale*.—Licences in form D.S.-2 for the sale of denatured spirit may be granted by the Collector to respectable persons, free of fee, on their showing that they have a demand for such spirit. The licence may sell in quantities not exceeding 50 gallons to other holders of D.S.-4 licences or holders of special licences in form D.S.-3 (variable or fixed) and not exceeding one gallon to private persons. Every licence of a gallon shall be treated by a permit in form D.S.-5 to be granted by the licensee.

8. *Licences*.—*Special*.—Licences in form D.S.-3 may be granted by the Collector to respectable persons and others for possession of denatured spirit in such quantities as the Collector may determine in consideration of their reasonable requirements for use in their business but not for sale.

9. *Licences*.—*Railway companies*.—Licences in form D.S.-4 will be issued to railway companies for the storage and use of denatured spirit and its distribution to subscribers on their respective lines as may be specified in the licence but not for sale. The railway companies will be exempted from taking out separate licences for individual stations for possession and use of the spirit received from the D.S.-5 permits, but transport of more than one gallon shall be covered by a permit in form D.S.-5 to be issued by the Revenue in each case.

10. *License to distill and denature.*—Licenses in form D.S.-6 will be granted by the Collector to individuals and druggists who for special reasons require antiseptic spirit.

11. *Limit of possession.*—The quantity prescribed as the limit of private possession of denatured spirit is one imperial gallon. The limit of possession of antiseptic spirit is one imperial quart.

12. *Penalty for transport.*—No denatured spirit shall be transported in quantities exceeding one imperial gallon except under a pass in form D.S.-4.

13. *General conditions applicable to all licenses.*—(a) No shop or depot for the retail or storage of denatured spirit shall be located in the same building with any shop for the sale of intoxicating liquors for consumption on the premises.

(b) The license must be hung up in a conspicuous place within the depot or shop.

(c) No depot or shop shall be kept open between the hours of 8 p.m. and 6 a.m.

(d) Denatured spirit kept for sale shall be of good quality and unadulterated. Any attempt to render such spirit fit for human consumption is punishable under section 33A of the Indian Opium Act. Should any inspecting officer be of opinion that any spirit found by him on inspection is intentionally denatured he shall report the matter to the Collector and may at the time of inspection remove the spirit in question to cause the sample to be sealed and submit a sample to the Government Laboratory for analysis and report. If the analysis shows that it is intentionally denatured the spirit shall be at once treated as such, or, failing that, destroyed.

(e) True samples of (preservatives shall be maintained from day to day in bulk in form D.S.-7 by the holders of licenses other than those in form D.S.-1 who shall maintain their accounts in the form appended to such license. The accounts and permits shall be in printed books which may be obtained from local Revenue offices on payment of out-pose. The permits received and the counterfoils of permits issued shall be preserved for one year after the period covered by the license and shall be produced when called for by any officer not below the rank of Assistant Inspector of the Salt, Akbari and Customs Department.

(f) No privilege of storage or use shall be sold, transferred or sub-letted without the Collector's previous permission. Nor, if the Collector so orders, shall any spirit be appointed for the management of any such privilege without his previous approval.

(g) With the minutes of the Board of Revenue any license shall be revocable by the Collector on giving the licensee fifteen days' notice of such revocation.

(h) The premises for which the license is granted shall be open to inspection by an officer of the Salt, Akbari and Customs Department, not below the rank of Sub-Inspector, and the Inspector shall be furnished with such information regarding the quantity of spirit used as may be required by him.

(i) All inspecting note-books, with pages numbered consecutively shall be maintained for the use of inspecting officers and shall be handed over to the Inspector of the Circle or to any other officer authorized by him to receive it on a receipt being given therefor.

(j) Every bottle, jar and cask containing denatured spirit received into or kept for storage on sale shall be conspicuously labelled or branded with the words "made and <sup>denatured</sup> in India" or "made in <sup>denatured</sup> India" or "made and <sup>denatured</sup> in <sup>denatured</sup> India" as the case may be.

(k) Licensees shall be bound by any additional rules that may be prescribed by the Board of Revenue from time to time.

(l) In case of breach of any of the conditions of a license it shall be competent to the Collector to impose a fine not exceeding Rs. 100 for every such breach or to suspend the license forthwith. The imposition of a fine or suspension of a license shall not be held to prevent the license from being prosecuted under Act I of 1855.

#### GOVERNMENT LABORATORY TESTS TO ASCERTAIN THE PURITY OF SAMPLES OF LIGHT CARBONIC ACID AND PREPARED BATHS FOR CARBONIC ACID BATHS.

##### 1.—Specification of Light Carbonic Acid.

1. *Refractive.*—By "anhydrous" is meant the liquid obtained by the dry distillation of redistilled rubber. By "light carbonic acid" is meant the liquid obtained by redistilling "anhydrous" and collecting the portion which passes over at or below about 20° C.

2. *The specific gravity of light anhydrous.*—The specific gravity of light anhydrous at 60° F. should be between .935 and .937 referred to water at 15° C.

3. *Boiling test.*—For the purpose of this test, 100 c.c. of light anhydrous should be collected in the pyridine testing flask (see specification for pyridine base). Under these conditions not more than 10 c.c. of distillate should pass over at or below 120° C. whilst a total (including the lamping) of at least 70 c.c. should pass over at or below 200° C.

4. *Amount of water contained.*—When 25 c.c. of light anhydrous are shaken with an equal volume of water in a stoppered graduated cylinder and due time is allowed for the liquids to separate again into two layers, the light anhydrous should show no appreciable discoloration.

5. *Reactivity.*—The aqueous layer obtained from test 4 should show no marked acidity as efficiently when tested with both red and blue litmus paper.

6. *Test of saturated sulphuric acid.*—At least 70 per cent of the light cresolcholine should be soluble in concentrated sulphuric acid. For testing this, 25 c.c. should be measured & 10 c.c. added & stopped separating cylinder of suitable capacity and sulphuric acid should be added, at first with great care and in very small quantities. After each addition of acid the cylinder should be shaken and cooled to avoid loss of volatile constituents. Sufficient acid must be used (usually about 80 c.c.) for the light coloured layer to become quite dark so that it can separate readily from the upper layer of washed constituents. After a final thorough shaking and cooling, the cylinder should be left for about three hours to effect complete separation of the two layers and the lower layer be then tapped off. The almost colourless upper layer should be again shaken with strong sulphuric acid until it appears free from soluble constituents (as judged by the colour imparted to the sulphuric acid) and separated as before after shaking. It should finally measure not more than 7 c.c. The acid used should be of specific gravity 1.84 and may be of somewhat quality.

7. *Freedom from water.*—Light cresolcholine should not contain any appreciable amount of water. Any office engaged in drawing samples for test should certify on the bottle that he has drawn the sample from the bottom of the containing vessel when the water, if present, will be found. For this purpose he should employ a siphon tube of which the shorter limb reaches to the floor of the containing vessel. He should also ensure himself that the sample is collected in a bottle free of moisture.

## II.—Specification of Pyridine bases.

1. *Colour.*—The solvent must not be darker than that given by two cubic centimetres of dehydrated indole solution dissolved in one litre of distilled water.

2. *Miscibility with water.*—20 c.c. of the pyridine bases should give a clear mixture with 40 c.c. of water; or else a mixture only so slightly opalescent that, after standing for five minutes, ordinary newspaper type is clearly visible through a layer 15 c.m. deep.

3. *Amount of water present.*—From 25 c.c. of the pyridine bases mixed with 30 c.c. of caustic soda solution (density 1.4), at least 10.5 c.c. of the bases should separate, after having been repeatedly shaken together and allowed to stand.

4. *Viscosity.*—Dissolve 1 c.c. of the pyridine bases in 15 c.c. of distilled water. Throat with normal sulphuric acid until a drop of the mixture gives a definite blue spot on compressed paper (the blue colour should at once disappear). At least 10 c.c. of the normal sulphuric acid should be required to produce this reaction. (To prevent the compressed paper, dissolve one gram of compressed indole in five of distilled water. Soak filter paper in this and then dry.)

5. *Chlorine chloride reaction.*—Vigorously shake together 15 c.c. of a solution of 1 c.c. of pyridine bases in 100 c.c. of distilled water with 5 c.c. of a 5 per cent solution of dry fused calcium chloride. A distinct crystalline precipitate should immediately result.

6. *Boiling-point.*—Distil 100 c.c. of the pyridine bases in the manner described below. At least 10 per cent should distil over at or under 140° C.

Method.—100 c.c. of pyridine bases are placed in a short-necked copper flask of about 200 c.c. capacity. The flask is arranged as an asbestos pad which has a central hole of 30 mm. diameter cut in it. To the flask is attached a fractionating column (consisting of a tube 12 mm. wide and 470 mm. long, provided with one bulb) of which the side-tube (forming 1 c.m. above the bulb) joins a Liebig's condenser of which the cooled part is at least 400 mm. long. A standard thermometer is placed in the head of the column so that its bulb occupies the centre of the bulb of the column.

The speed of distillation is adjusted to 5 c.c. per minute, the distillate being received in a graduated glass cylinder. At least 90 c.c. should distil over at or under 140° C. at a barometric pressure of 750 mm.

If the barometer varies from 750 mm., a correction of 1° C. for each 30 mm. of variation should be applied (e.g., under 770 mm. of pressure 90 c.c. of distillate should come over at or under 140.4° C., whilst under 730 mm. the same amount of distillate should come over at 139.7° C.).

Note.—Pyridine bases are a single definite compound (C<sub>5</sub>H<sub>5</sub>N) boiling at about 110° C. Pyridine bases are mixtures of pyridine with closely allied compounds boiling at various temperatures. They are cheaper and more effective insecticides than the pure pyridine.

M. R. R. C. Subbarat Ram Aravali.

217. Read, approved and recorded the minutes of the proceedings of the previous meeting held on Thursday, the 19th September 1918.

218. Read again Port Trust Board Resolution No. 204, dated the 15th September 1918, Read a draft by the Chairman of a letter to Government on the subject of the removal of Madras Port affairs under the "Defence Scheme".

Resolved to adopt the draft letter to Government and to furnish a copy of it to the Collector Port Commissioners.

219. Read again Port Trust Board Resolution No. 145, dated the 22nd August 1918 and Government Memorandum No. 45/2-5, Madras, dated the 26th September 1918, forwarding for perusal a copy of the opinion of the Advocate-General in regard to the two suggested amendments of the Port Trust Act proposed in the above quoted resolution.

Resolved to accept the Advocate-General's opinion.

220. Read the Presidency Port Officer's letter to the Chairman No. 1081/223 H., dated the 1st July 1918, and subsequent notes and correspondence ending with the Chairman's note, dated 24th September 1918, on the subject of the proposed of moving line by Government vessels in Madras Harbour.

Resolved to submit the correspondence ending with the last named note to Government for favour of a ruling.

221. Read again Port Trust Board Resolution No. 202, dated the 15th September 1918.

Resolved to amend the opinion of the Board that the loss of its only tug will be felt very seriously by the Trust, as well as by steamers whose security to and from the coast will be greatly delayed, for lack of towing power.

Resolved also to amend that the loss of the tug cannot but have a very serious effect on the use of the Port Quay, especially in connection with the shipment of bulk cargo, etc., for maritime purposes.

Also resolved that it is in spite of the Trust's representations, the tug is not considered, Government be asked to consent to the following terms for the use of her:—

(a) In case of the non-availability of the vessel, Government to pay for her replacement by a similar vessel as soon as such replacement is procurable.

(b) Next, should the vessel return from service, Government shall pay the full cost of putting her back into her present condition of repair and efficiency.

(c) That Government be furnished with a copy of the Chairman's note, dated the 15th September 1918, suggesting the principle on which he calculated Rs. 40 to 50 a day as a fair rate for the loss of the tug which crew or stores; but that Government be asked to consider whether under existing circumstances, £10 per day might not be a fair rate of hire.

Resolved also to record that in making these stipulations, the Board is not influenced by any selfish or extraneous motives, but merely wishes to make it clear that by the removal of the tug very serious injury is being inflicted on the working arrangements of the Port of Madras which possesses no other vessel able to perform any of the duties for which the tug "Thames" has been specially designed and used.

222. Read a note by the Registrar-Chief, dated the 15th September 1918, on the progress of the various resolutions under.

Resolved to cover the report which went to Government with the Chairman's letter No. 2178, dated the 2nd September 1918.

Resolved also that copies of the report be furnished to both Chambers of Commerce and to the Trades Association.

259. The draft administrative report of the Marine Fur Fund for the year 1937-38 was read and adopted.

260. Read a note by the Chairman suggesting an alteration of clause 8 (f) of Part I (A) of the Trust's Scale of Rates.

Resolved under section 41 of the Port Trust Act to accept the Chairman's recommendation, and under section 44 (1) to submit it to Government for sanction and publication.

261. Read a note by the Traffic Manager recommending the grant of an additional free day for the passage through the port of the super cargo of the "S.S. 'Fenicia'", arrived on 15th September 1938.

Resolved that, inasmuch as the Traffic Manager reports that the delay in the completion of the transit through the port of the cargo of the "Fenicia" did not interfere with the completion of later shipments, the additional free day be granted under clause 8 (e) of Part I (A) of the Trust's suggested Scale of Rates.

262. Read sundry protests from rice and sugar merchants against the policy adopted in Part I (B) of the suggested Scale, Nos. 187 and 194, dated the 22nd August and 24 September, respectively. Read also two sugar correspondence on the same subject coming with the Chairman's letter to the Rulers, Mr. Mohan Thun, Nyaung and other local newspapers, No. 2, 1938, dated the 23rd September 1938.

Resolved to place on record that the policy announced in the Chairman's letter referred to in the Trust's policy, namely, that the further transits made are intended for the passage through, and not for the storage, of cargo; also that the Trust is satisfied that the free days, as explained in the Chairman's letter, will sufficiently be ample for the removal of cargo. But in any case of clearly proved hardship where, in spite of due diligence, the penalty does have been incurred under the two previous conditions, the Board is prepared, on the Chairman's recommendation, sympathetically to consider whether it cannot grant one or more additional free days. This measure (also power to enter, by resolution, in writing, under clause 8 (e) of Part I (A) of its suggested scale of rates—as it has done to-day in the case of the S.S. "Fenicia", arrived on the 15th September 1938.

Resolved always that the duty in removing a vessel's cargo which has given rise to the demand for additional free days has not interfered with the transit through the port of the cargo of a following shipment.

Resolved also that a copy of this resolution be sent to both Chambers of Commerce, to the Trade Commission, to Government in the Marine Department, to the Director of Civil Supplies and to the local press.

263. Read a memorandum by the Deputy Commissioner No. 1034, dated the 27th September 1938, submitting, for approval, a statement of the income spent percentages which he has agreed with representatives of firms interested in the Burma oil trade should be taken (if permitting it to be given for general oil cargo or coal bunkering to proceed simultaneously with the pumping of oil ashore).

Resolved to record the memorandum with an expression of approval, and that a copy of this resolution, as well as of the statement of percentages, be communicated to all concerned for information and guidance.

264. Resolved, subject to sanction of Government, which is necessary under section 41 (f) of the Marine Port Trust Act, to approve of the Trust's Traffic Manager's recommendation for reduction of ground dues, in two cases, according to Pa. 35-34-4.

265. Received a statement showing the purchase of English materials made by the Board's purchasing agents in England of which information has been received since March 1938.

The Standard Barometer and Thermometer are read at 5 a.m., 11 a.m., 4 p.m. and 8 p.m., and the daily means are obtained by the application of hourly corrections, deduced from twenty years' observations. The column of the barometer is twenty-two feet above the level of the sea, and the zero of the rain gauge is two feet from the ground. The wind, rain and general weather registered are for the current mid-day—noon midnight to midnight.

The total quantity of rain collected since January 1st is 21.01 inches, the average due for the same period being 20.14 inches.
